

EXPERTS IN CLINICAL/BIOMEDICAL ENGINEERING SERVICES TRIMED Solutions (I) Pvt. Ltd

OUR ROOTS

TRIMED Solutions (I) Pvt Ltd was established in the year 2012. TriMed Solutions strives passionately to deliver Healthcare Technology Management Services (Bio-Medical Equipment Maintenance Services) and provide top-notch service support to healthcare facilities with minimal interruptions. With the trust and faith earned from our valuable clients, we presently provide services in both private and public healthcare facilities to over 200,000 medical devices in more than 3000 healthcare facilities.

OUR PEOPLE

TriMed has built a team of healthcare experts, including Consultants, Biomedical Engineers, Project Managers, Quality Systems managers, and Information System Engineers. We have established a reputation of being a reliable service provider of practical and achievable healthcare solutions and services.

Trained Bio-Medical
Engineers & Project Managers

Office Location

Medical Equipment.

Preventive Maintenance and
Calibration, User Training.

KEY RESOURCES

- Over 500 trained clinical/biomedical engineers
- Well-equipped state-of-the-art training center
- Association with global manufacturers and suppliers
- Web-based computerised services management system with mobile application
- Smartphone-based work order management and attendance monitoring with GPS tracking
- Huge collection of technical and operating manuals

Vision

To provide cost-effective Biomedical Engineering Maintenance Services to the Healthcare Industry

Mission

To provide the highest service quality at the lowest cost, meeting global standards by using our highly experienced, globally recognized team

Philosophy

We will conduct our business always in an ethical, lawful, and socially responsible manner. Our employees can realize their fullest potential, ensuring that employment with TriMed can be a mutually beneficial experience for both the individual and the organisation

Quality Policy

Our Quality Policy is defined by strong and effective management principles and behaviors, striving for 'excellence' by providing customized solutions, products & services that best satisfy our customers and continuously improving quality, developing staff competencies, reliability & service with the aid of an effective Quality Management System, fulfilling all statutory, health, safety & environment requirements at our workplace and customer place.

HIGHLIGHTS

1

CONTRACT COST CALL

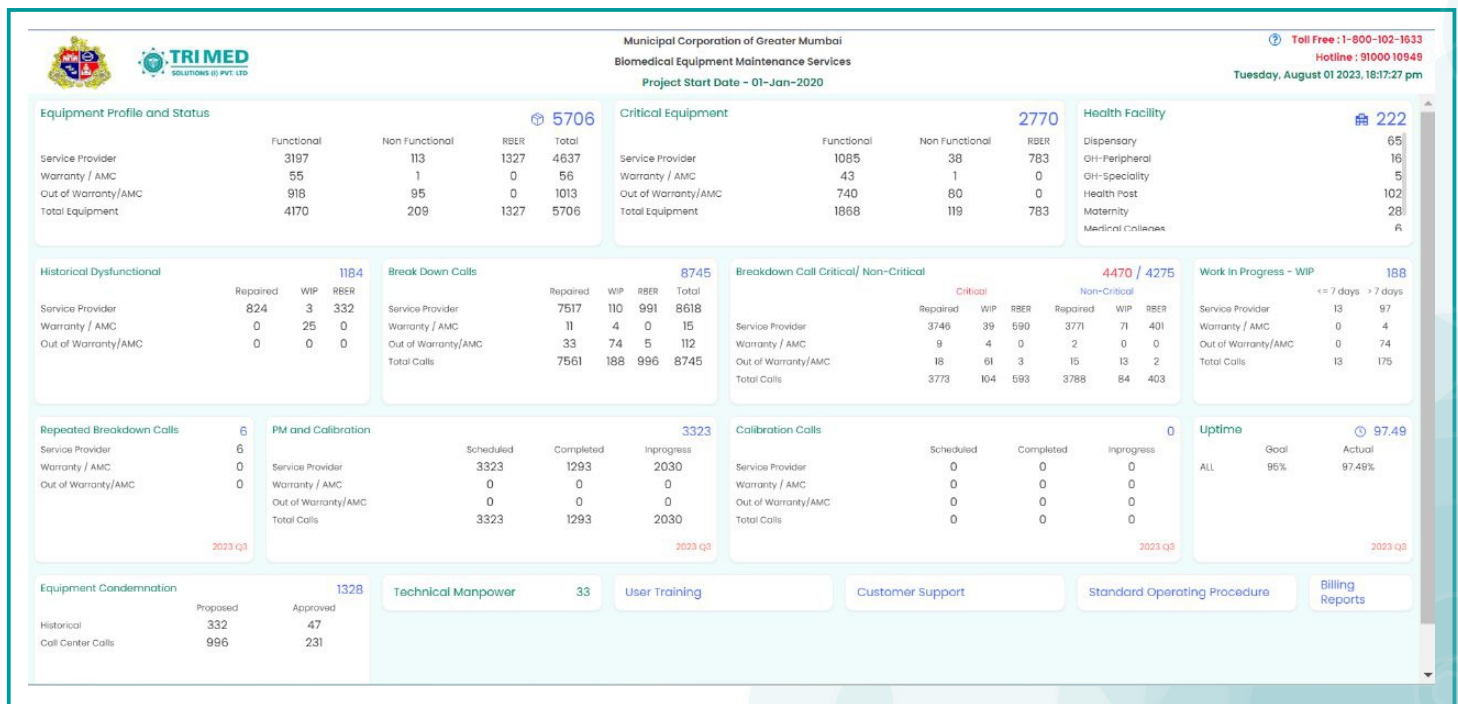

We are Certified
ISO 9001 : 2015
ISO 13485 : 2016
ISO 17025 : 2017

BENEFITS OF SINGLE CONTRACT FOR ALL BIOMEDICAL EQUIPMENT MAINTENANCE

- 24 X 7 service coverage
- Complaint register logging system with a toll-free number
- Web-based equipment status/Live dashboard
- Effective preventive maintenance
- Compliance with regulatory requirements & risk assessment
- Support for certification programs like NABL, AERB, NABH, etc.
- Procurement consultancy

A GLANCE OF DASHBOARD

Call Generation Notification

Service Call BM-MH-2022-12812 is created on 13/2/2022 For MHMCGMMCH0010609 Oxygen Concentrators (Oxygen Concentrator) Testing call Our staff will get in touch with you Soon. Thanks. BMMPMH

Call Completion Notification

Service Call BM-MH-2022-12812 is completed on 13/2/2022 For MHMCGMMCH0010609-Oxygen Concentrators(Oxygen Concentrator)- Functional Revert Back if any complaint to 1800 102 0433 Thanks. BMMPMH

COMPREHENSIVE BIOMEDICAL EQUIPMENT MAINTENANCE

- Biomedical Equipment Mapping
- Bar-coded unique identification numbers are assigned to each equipment
- Usage of smartphone-based application to capture equipment details
- Proactive management of medical equipment for optimal utilisation
- Our unique maintenance management software generates reports for optimal usage of equipment
- Preventive Maintenance Scheduling
- Preventive maintenance of equipment is scheduled according to manufacturer recommendations
- Equipment-specific checklists are used
- Stickers are affixed on equipment to display the status of equipment after maintenance
- Performance Verification
- Performance of equipment is verified according to the manufacturer's specification
- Usage of biomedical test analysers to verify performance
- Risk Assessment
- Internationally-recognised risk assessment of biomedical equipment
- Strong association with global manufacturers & suppliers enables us to introduce the latest technology to users

QUALITY ASSURANCE PROGRAM ON DIAGNOSTIC X RAYS

Quality Assurance (QA) of medical diagnostic X-ray equipment signifies systematic actions necessary to provide adequate confidence to the end-users. Quality Assurance of the medical diagnostic equipment, such as X-rays, will enable them to perform satisfactorily, in compliance with safety standards specific to the Atomic Energy Act.

WHY BIOMEDICAL EQUIPMENT NEED PERIODIC MAINTENANCE & CALIBRATION?

Calibration at regular intervals is essential for medical equipment. Like any other equipment, it is subject to wear and tear over a period of time, directly impacting its performance accuracy.

- To minimise uncertainty in measurements
- To reduce errors in measurement results
- To receive necessary certifications and licences from regulatory authorities

Calibration As Per Global Standards

BIOMEDICAL TEST ANALYSERS

- Test the medical device with a wide variety of global standards
- Helping in calibration performance checks
- Accurate digital measurements
- Standards followed are IEC 60601-1 and 62353
- All test equipment is calibrated and traceable to international standards

TEST EQUIPMENT

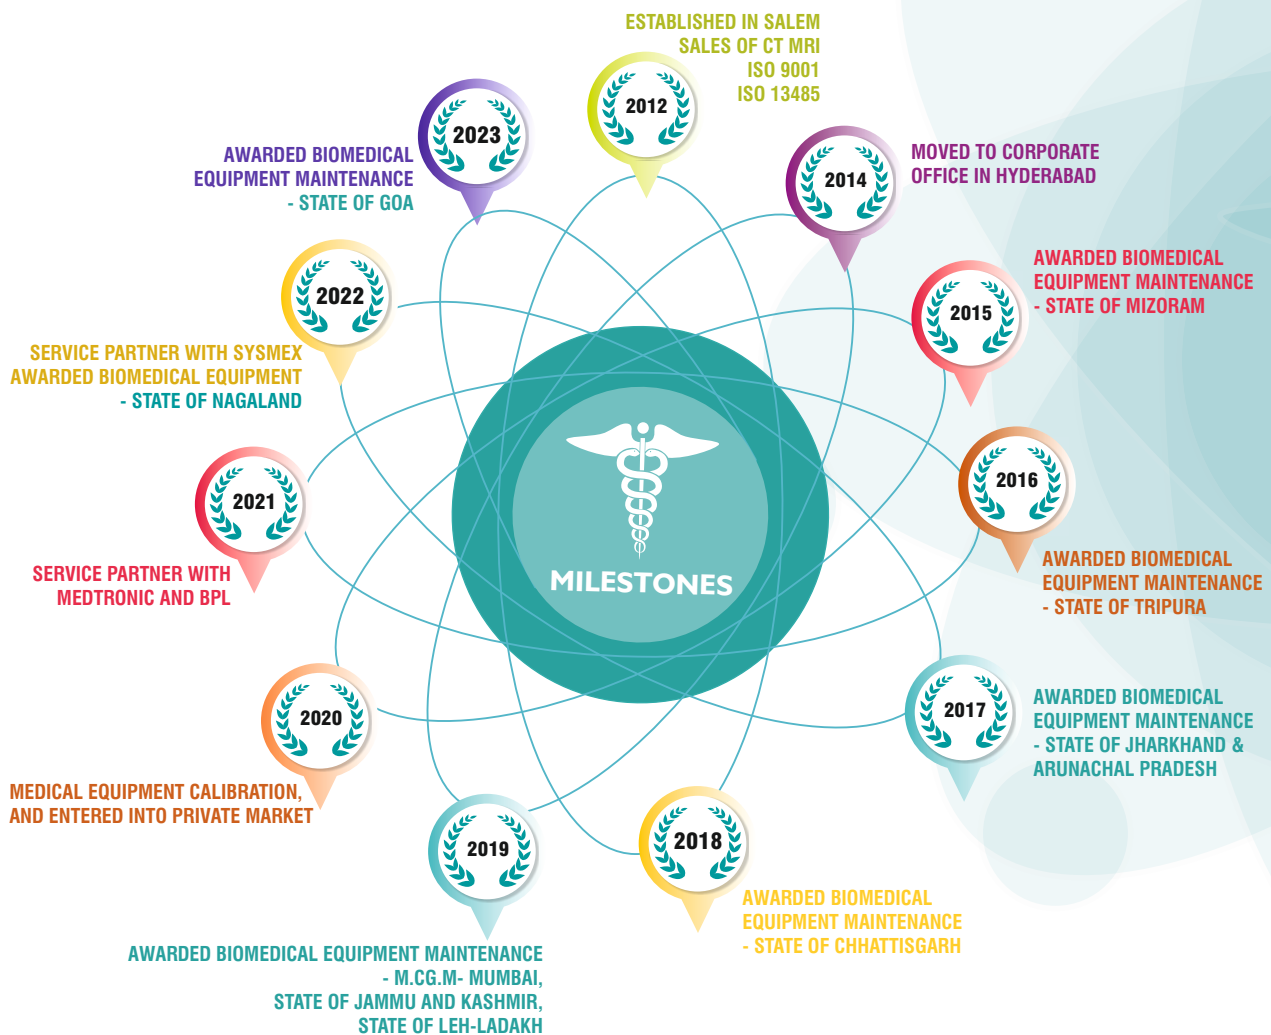

- Defibrillator Analyzer
- Electrical Safety Analyser
- Infusion Pump Analyser
- Ventilator Analyser- TSI
- Vital sign simulator
- KVP Meter
- Electro Surgical Analyser
- Standard Weights
- Lux Meter - Amprobe
- Digital tachometer
- Stop watch
- Xi Mammography Phantom
- MA Meter
- Digital Hygrometer
- Fetal Simulator
- Digital Pressure Meter
- Sound Level Meter
- Measuring Tape
- Multimeter-Digital
- Mammography Phantom
- All in one image quality Test Tool Phantom
